This guide has been designed to help in identifying the proper setbacks regarding where aboveground storage tanks (AST) can and should be placed in relationship to other items such as buildings, dispensers, tanks, property lines, etc. This guide applies only to AST systems that were installed or replaced after 10/13/2014. This guide is meant to direct you to the proper sections in NFPA 30 and NFPA 30A.

The guide is a perfect companion for your drivers, salesmen, maintenance personnel, or other key employees involved in the placement of AST systems. If you would like to purchase additional copies of the guide, please fill out the form below and return to MPA/MACS with your payment.
